

All invasive cancers

Risk of diagnosis among males

Level of Uncertainty

Distribution of smoothed SIR estimates according to:

(a) Socioeconomic status

(b) Rurality

Notes: Smoothed SIR (Standardised Incidence Ratio) estimates are in comparison to the Queensland average (red line on graphs), and should not be directly compared between SLAs (Statistical Local Areas). Data are for cases diagnosed between 1998 and 2007.

All invasive cancers

Risk of death within five years of diagnosis among males

Level of Uncertainty

Distribution of smoothed RER estimates according to:

(a) Socioeconomic status

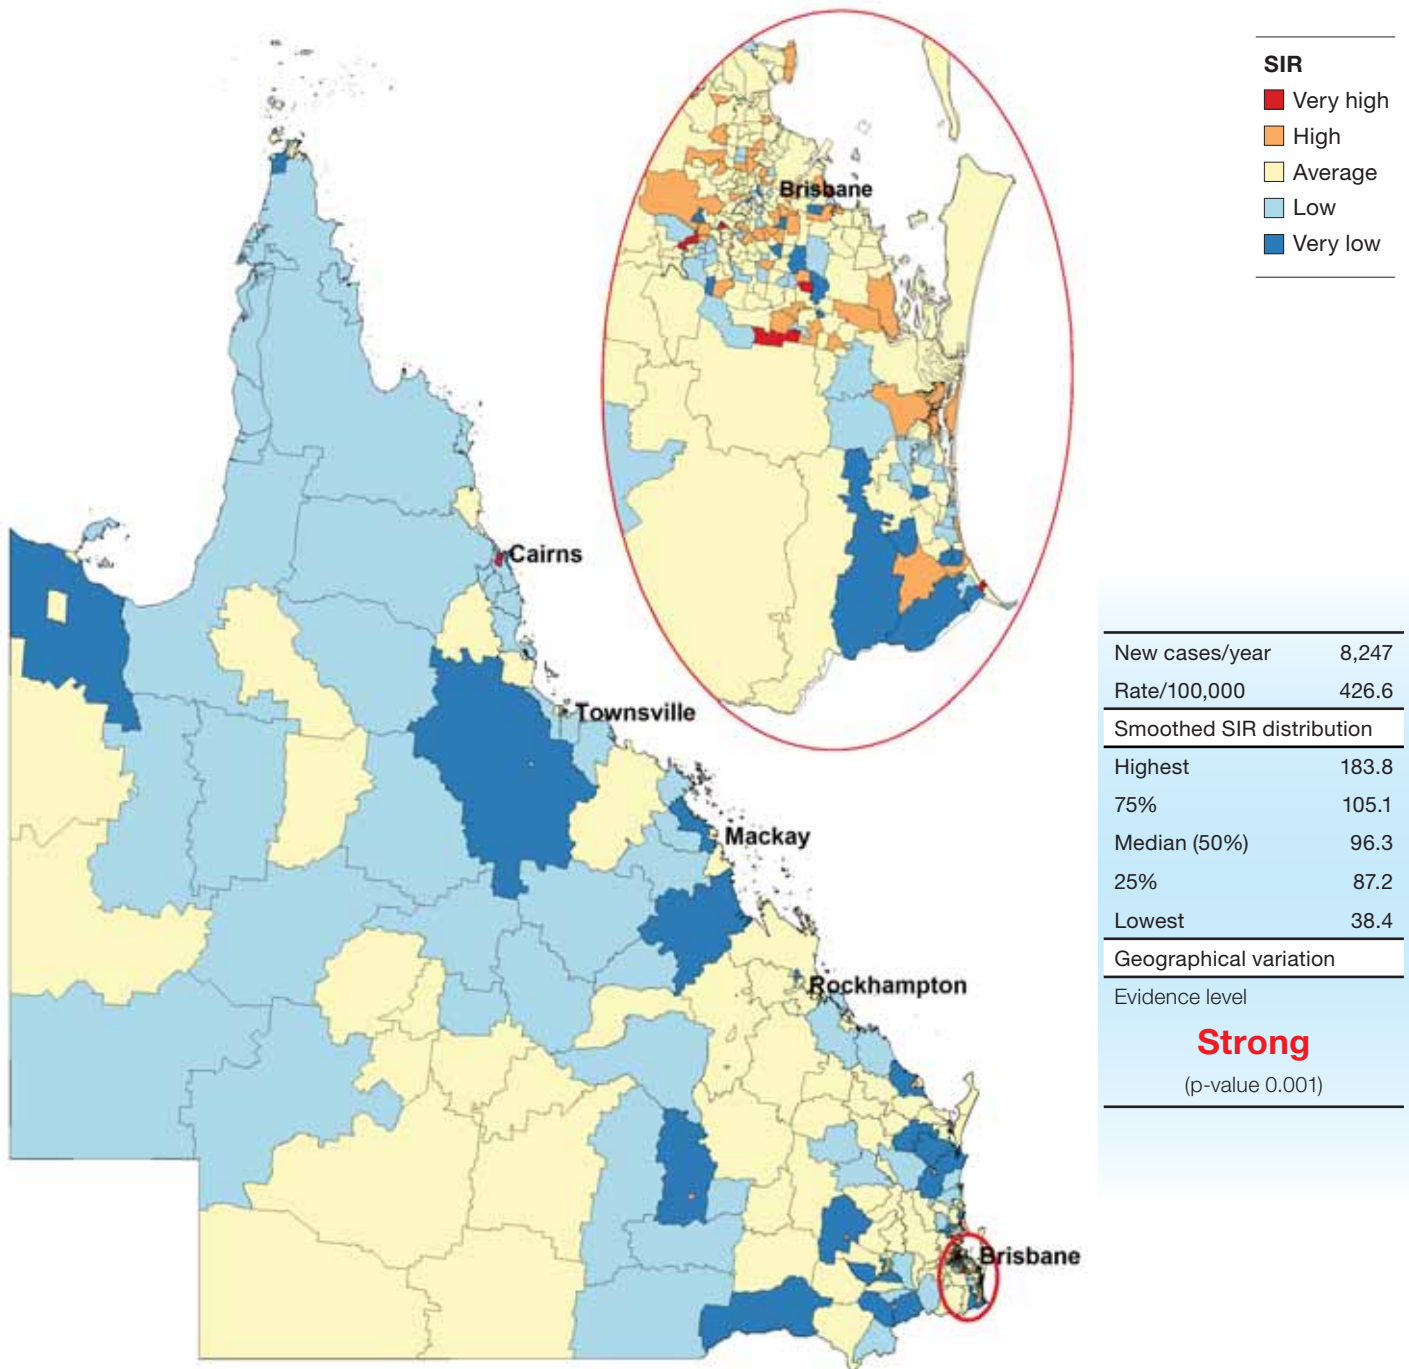

(b) Rurality

Notes: Smoothed RER (Relative Excess Risk) estimates are in comparison to the Queensland average (red line on graphs), and should not be directly compared between SLAs (Statistical Local Areas). Data are for 'at risk' cases in the period 1998 and 2007.

All invasive cancers

Risk of diagnosis among females

Level of Uncertainty

Distribution of smoothed SIR estimates according to:

(a) Socioeconomic status

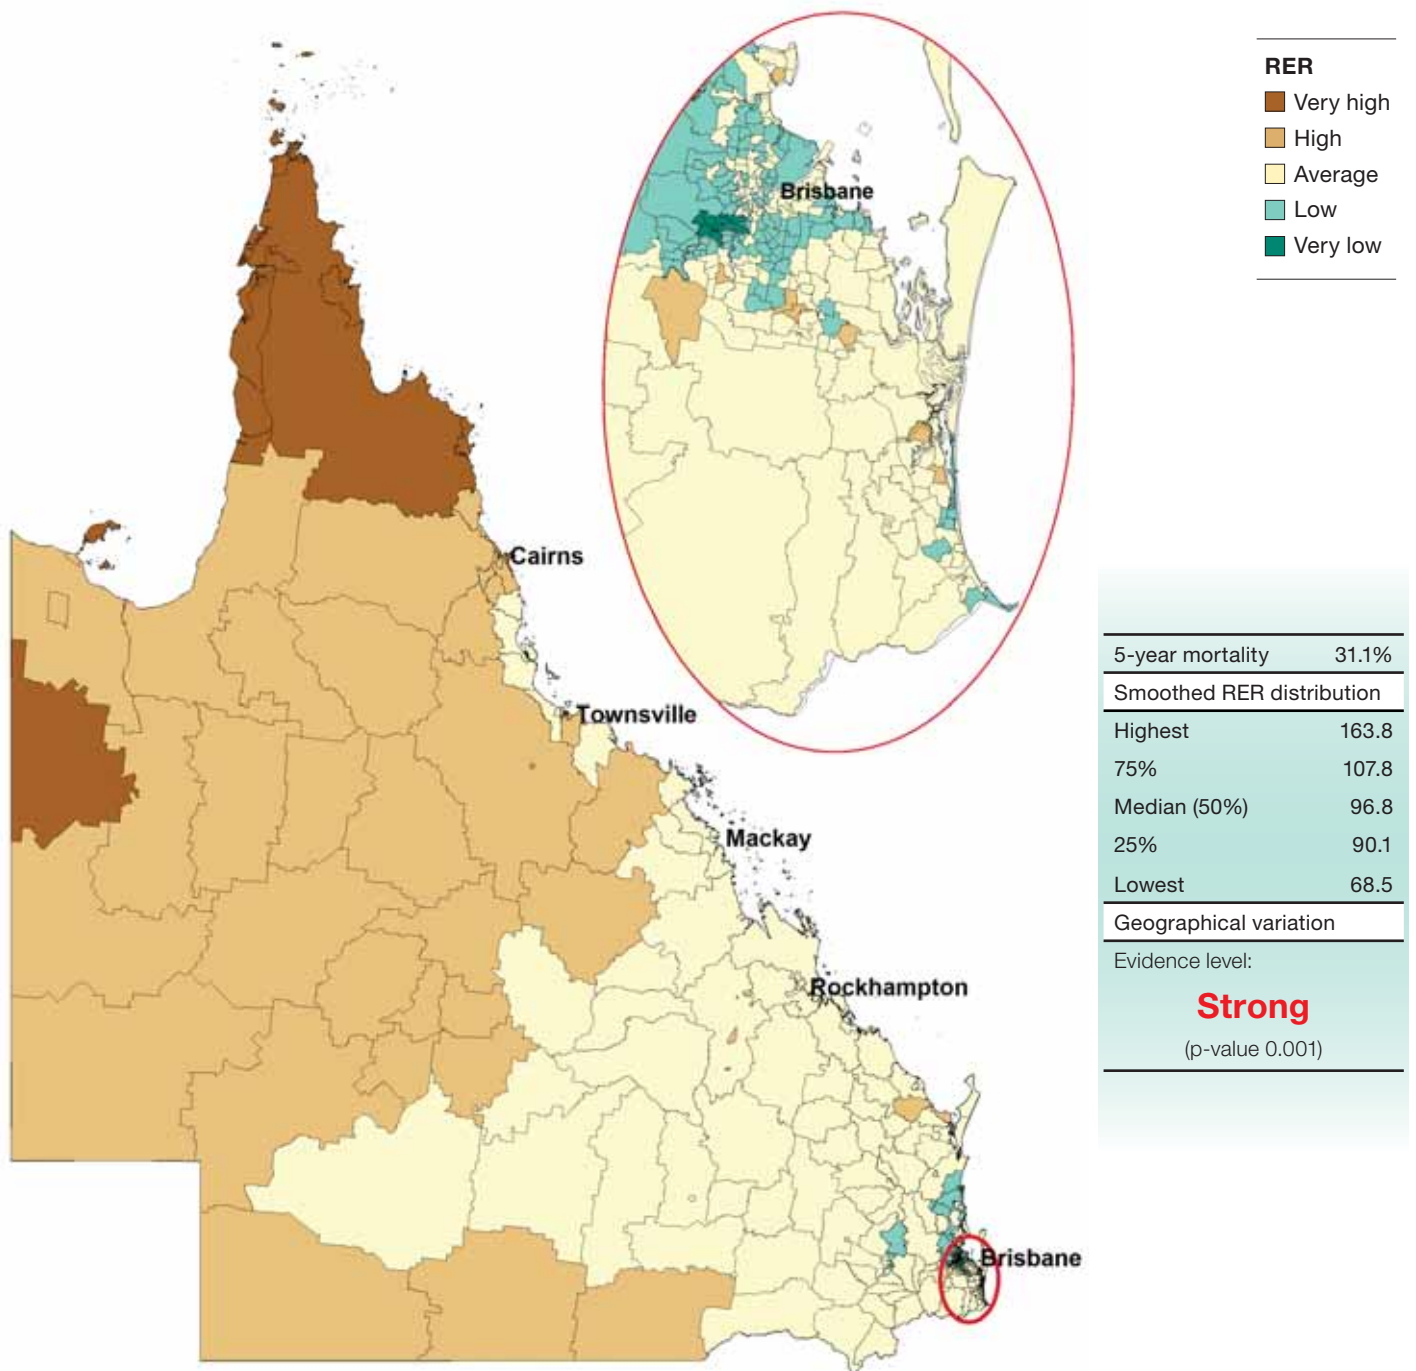

(b) Rurality

Notes: Smoothed SIR (Standardised Incidence Ratio) estimates are in comparison to the Queensland average (red line on graphs), and should not be directly compared between SLAs (Statistical Local Areas). Data are for cases diagnosed between 1998 and 2007.

All invasive cancers
